

FOREIGN PATENT – ABSTRACT**Method of installing a weighbridge construction and device for implementing the method****APPLICANT(S)- Master K****PATENT APPLICATION NUMBER- 00420065****PUBLICATION DATE- 2000-10-18**

Procedure for installation of a weight bridge on site ensures that only one bridge calibration, in the factory, is required, ensuring that an expensive re-calibration on site is not required. Procedure for installation of weigh bridge (2) that is to be mounted on a support structure (10). Bridge sensors (4) include a support plate (6) that is fixed between the bridge (2) and its support structure (10). The procedure involves sealing of the support surfaces (20) on which the support plates (6) are to be fixed and then fixing of the support plates in position on site. Prior to transport, i.e. prior to mounting on site the support plate structures can be clamped to the bridge (2).
